

Slide: dip l1

Topics:

- Why digital image processing?
- What is digital image?
- What is pixel?
- The fundamental steps in digital image processing. (explain) (broad question)
- Maths at the end of the slide.

Slide: Intensity transformation

Topics:

- What is image enhancement.
- What is thresholding? Explain with necessary diagrams. (broad question)
- Brightness, contrast, sharpness
- Negative transformation + math
- What's contrast stretching.
- Explain bit plane slicing.
- What's histogram + histogram equalization math.
For histogram equalization math show (input image histogram, calculation table, output image histogram).
