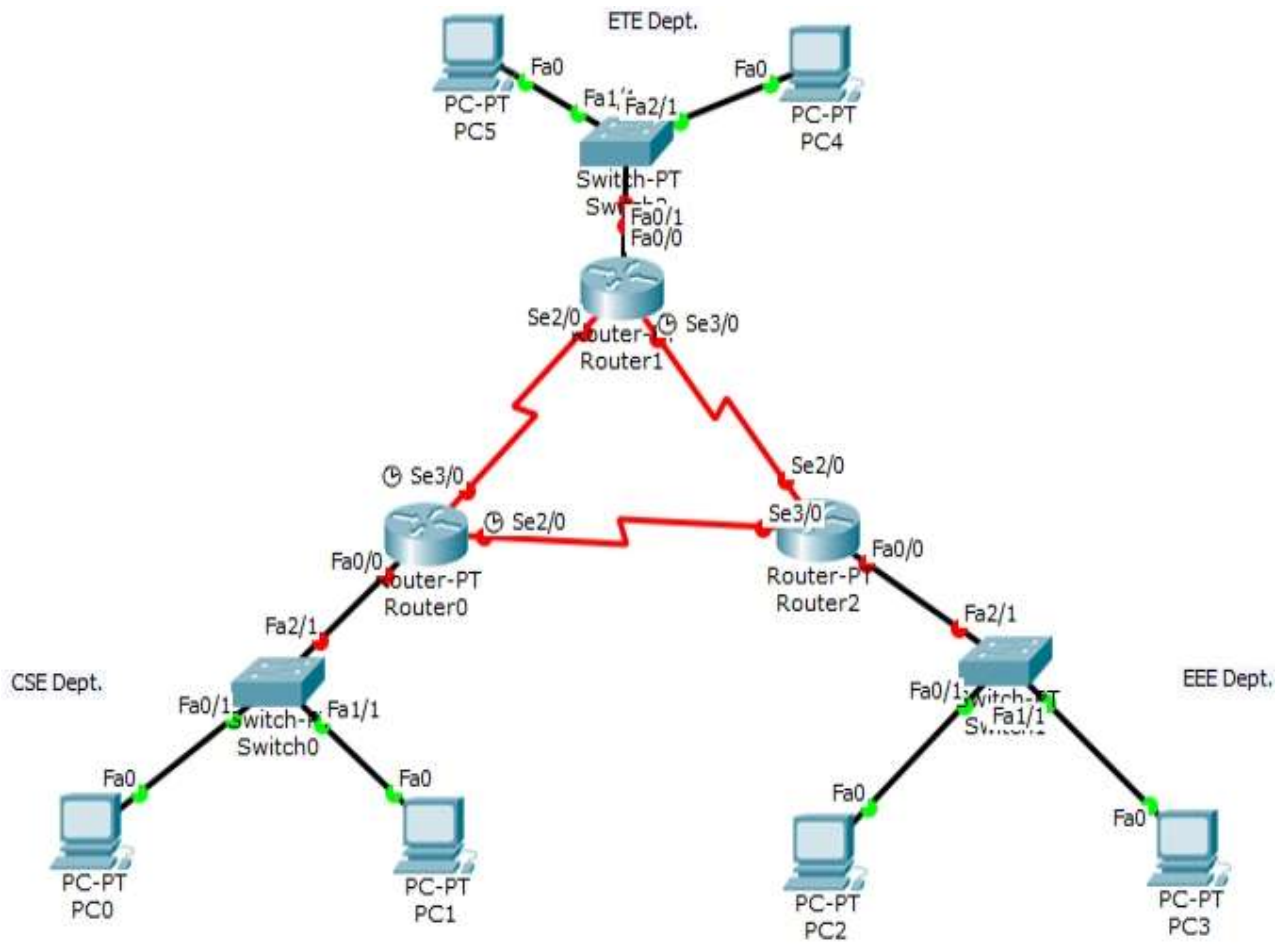
Problem Statement: Suppose you are working an ISP company as a network engineer. You have been given an IP address block of 172.17.0.0/20. You must provide for the following subnet arrangement for the company:

(a) 1st subnet, CSE Department LAN, up to 112 hosts
(b) 2nd subnet, EEE Department LAN, up to 210 hosts
(c) 3rd subnet, ETE Department LAN, up to 64 hosts
(d) Point to point link between CSE and ETE,
(e) Point to point link between CSE and EEE,
(f) Point to point to point link between EEE and ETE.

Fill up the following table, configure the exhibit and test the connectivity of the following cases:
(i) Ping from PC0 to PC5 (ii) PC1 to PC3 and (iii) PC2 to PC5


Subnet Name	Needed Size	Allocated Size	Network Address	Mask	Assignable Range	Broadcast Address
